IMPORTANT INFORMATION ABOUT THE DESERT

The desert is very hot and dry, and it is easy to overheat.

Here are a couple of tips:

Carry a water bottle with you everywhere you go.

Constantly drink or sip water.

Bring plenty of sunscreen and reapply often.

Bring a hat to wear, as the sun is very intense.

When drinking alcohol, make sure to drink at least a glass of water between each drink.

Constantly drink water

REMEMBER – when you start to feel thirsty, it is too late – it is very easy to suffer heat stroke.
